

Jurassic English™ Student Academy

A Student-Based Business Model Separate from Institutional Licensing

A4 Business Structured Layout | Expanded with Jurassic English™ v3.5 Context

Strategic thesis	Jurassic English™ Student Academy should be built as a separate B2C/B2B2C learning pathway that sells academic English thinking directly to students and parents while protecting the school-facing institutional licensing model. The student line should use the same intellectual engine - authentic literature, the Jurassic Thinking Cycle™, neuroinclusive access, CEIW writing, and the Digital Reasoning Engine - but package it as individual learner progress, fluency, academic confidence, and visible portfolio development.
------------------	---

Business Line	Primary Buyer	Core Promise	Commercial Logic
Jurassic English™ School Framework	Schools, centers, administrators	Curriculum coherence, teacher training, licensing, QA	High-ticket institutional sales and implementation
Jurassic English™ Student Academy	Parents, students, homeschool families	Fluency, academic reasoning, writing, confidence, portfolio proof	Recurring subscription, cohorts, diagnostics, premium coaching

Prepared for strategic productization, student acquisition, and market separation.

1. Executive Summary

The student-based Jurassic English™ model should be positioned as a premium direct-learning pathway for ambitious learners who need more than general English tutoring. It should not be marketed as a cheaper version of the school framework. It should be a learner-facing academy that develops English fluency, academic reasoning, authentic literature comprehension, structured writing, neuroinclusive confidence, and exam-transfer capability.

The strongest offer is Jurassic English™ Student Academy: a direct-to-student learning pathway supported by diagnostics, guided cohorts, DRE-based reasoning scaffolds, parent-facing reports, and optional premium coaching. The model uses the v3.5 principle of Thought Architecture: students do not merely learn English content; they learn how to think, speak, justify, and reflect in English.

Primary recommendation	Launch with three clean products: (1) Student Thinking Diagnostic, (2) Core Student Academy subscription, and (3) IELTS / Academic Reasoning Lab. Do not launch every possible tier at once. The brand needs clarity before breadth.
------------------------	--

2. Strategic Context from the v3.5 Framework

The v3.5 materials shift Jurassic English™ away from a standard English-language product and toward a higher-value cognitive architecture. The framework rejects rote grammar, transactional test preparation, and simplified reading as the dominant model. High test performance, including IELTS 7.0+, is framed as a byproduct of deeper reasoning capacity rather than the central promise.

v3.5 Concept	Student-Business Translation	Commercial Meaning
Thought Architecture	Teach students how to reason in English, not only answer in English	Premium differentiation beyond tutoring
Authentic Literature	Use serious texts as thinking material, supported by scaffolds	Raises academic credibility
Regulation-Before-Reasoning	Prepare attention, confidence, and emotional readiness before complex output	Supports neurodiverse and anxious learners
CEIW Writing	Claim, Evidence, Interpretation, Warrant / Impact	Makes academic writing teachable and assessable
DRE Reasoning Scaffold	Digital support for argument mapping and response construction	Creates scalable subscription value
Ecological / Systems Thinking	Use literature to analyze human, social, and planetary consequences	Distinctive advanced pathway

3. Market Separation: Institutional Model vs Student Model

The school-facing Jurassic English™ model sells curriculum architecture, teacher development, licensing, institutional quality assurance, and implementation fidelity. The student-facing model sells individual learner transformation: fluency, academic thinking, writing confidence, exam transfer, and visible progress. These must remain commercially distinct.

Dimension	Institutional Model	Student Academy Model
Buyer	School owner, principal, academic director	Parent, student, homeschool family, tutor-supported learner
Decision logic	Governance, consistency, standards, differentiation	Progress, confidence, exam readiness, academic future
Sales cycle	Long, consultative, proposal-led	Shorter, diagnostic-led, parent/student conversion
Offer type	Licensing, training, curriculum audit, QA	Subscription, cohort, diagnostic, coaching
Proof required	Curriculum maps, standards alignment, teacher training evidence	Student samples, progress reports, speaking/writing evidence
Core risk	Institutional inertia	Parent confusion or price resistance
Best CTA	Book a curriculum consultation	Book a Student Thinking Diagnostic

Brand-protection rule	The Student Academy must be described as a supplemental individual learner pathway. The School Framework remains the full institutional implementation model.
-----------------------	---

4. Student Academy Brand Definition

Jurassic English™ Student Academy is a premium learning pathway for students who need to move from English exposure to English capability. It is especially relevant for learners preparing for international school, Cambridge/IB/AP-style academic work, IELTS, university interviews, academic writing, and global communication environments.

Brand Component	Recommended Language
Name	Jurassic English™ Student Academy
Core promise	Read deeper, speak smarter, write stronger, and defend ideas in English.
Parent promise	Your child will not only learn English; they will learn how to think in English.
Student promise	Build confidence, fluency, academic reasoning, and evidence-based writing.
Positioning category	Premium academic English and reasoning academy
Avoid positioning as	Generic tutoring, homework help, grammar center, test-drilling course

5. Target Learner Segments

Segment	Pain Point	Best Offer	Message Angle
Primary learners, ages 7-11	Parents want confidence and strong foundations, not passive worksheets	Starter / Core Academy	Build speaking confidence and reasoning habits early.
Secondary learners, ages 11-16	Fluent enough for school, weak in essays, literature, and argument	Core / Advanced Academy	Move from communication to academic English.
IELTS / university pathway students	Memorized templates fail under pressure; speaking anxiety persists	IELTS Reasoning Lab	Build arguments, not scripts.
International school students	Literature and essays become difficult despite good spoken English	Academic Thinker Program	Analyze texts and write with evidence.
Neurodiverse / anxious learners	Intelligent students blocked by attention, decoding, executive function, or anxiety	Built for Every Learner Track	High expectations with better access pathways.
Homeschool / alternative education families	Need structure, literature, portfolio evidence, and academic progression	Portfolio Academy	A complete literature-based English pathway.

6. Offer Architecture

Product	Purpose	Format	Suggested Price Logic
Student Thinking Diagnostic	Entry point and conversion mechanism	30-45 minute reading, speaking, writing, reasoning diagnostic	Low-cost or premium depending on report depth
Core Student Academy	Main recurring product	Monthly pathway with reading, speaking, CEIW writing, DRE tasks, parent reporting	Mid-tier subscription
Advanced Student Academy	Higher academic pathway	Authentic literature, argumentation, academic writing, portfolio review	Premium monthly subscription
IELTS Reasoning Lab	Urgent premium cohort	8-12 week cohort focused on argument, speaking confidence, essay reasoning	High-margin cohort fee
Academic Thinker Coaching	Scarce premium service	1:1 or small group coaching for essays, interviews, literature, university pathways	Premium package pricing
DRE Student Access	Scalable digital layer	Prompt cards, argument maps, CEIW feedback, portfolio evidence	Bundled or tiered add-on

7. Product 1: Student Thinking Diagnostic

The diagnostic should be the front door. Parents need proof before they buy an abstract promise like critical thinking. The diagnostic turns the invisible problem into visible evidence.

Diagnostic Component	What It Measures	Output
Short authentic passage	Comprehension and inference	Reading profile
Oral explanation	Speaking fluency and clarity of thought	Speaking confidence note
CEIW mini-response	Claim, evidence, interpretation, warrant control	Writing profile

Diagnostic Component	What It Measures	Output
Reflection question	Self-awareness and transfer	Learner mindset note
Parent summary	Strengths, gaps, recommendation	Recommended Academy pathway
Diagnostic closing statement	Your child is not weak in English. The issue may be that their academic reasoning pathway is underdeveloped. Jurassic English™ builds that pathway deliberately.	

8. Product 2: Monthly Student Academy

Tier	Learner Profile	Includes	Strategic Role
Starter Academy	Ages 7-10 / Pre-A1-A2	Story reasoning, speaking routines, visual supports, parent summary, basic DRE prompts	Accessible entry
Core Academy	Ages 9-13 / A2-B1	Thinking Cycle tasks, Accountable Talk, weekly CEIW responses, monthly portfolio	Main revenue tier
Advanced Academy	Ages 12-16 / B1-B2	Authentic literature, argumentation, academic vocabulary, portfolio review, DRE Advanced	Premium tier
Academic Thinker Track	Ages 14+ / B2-C1	IELTS/IB/Cambridge writing, Socratic seminars, research argument, essay coaching	High-value specialization

9. Product 3: IELTS / Academic Reasoning Lab

This is the fastest monetizable premium product because urgency is high and parents/students already understand the value of IELTS and university readiness. However, it must avoid the saturated tips-and-templates category.

Weak Market Message	Jurassic English™ Message
Get IELTS templates and common phrases	Build real arguments under exam pressure
Improve your band score quickly	Develop the reasoning behind Band 7+ performance
Practice more mock tests	Fix the logic, evidence, fluency, and confidence gaps behind the score
Memorize essay structures	Use CEIW to construct defensible academic responses

- Recommended format: 8-week cohort with 2 live sessions per week, weekly CEIW writing, speaking seminar, and progress review.
- Recommended proof assets: before/after writing samples, speaking clips, parent/student testimonials, and DRE portfolio screenshots.
- Recommended cap: 8-12 students per cohort to preserve premium quality.

10. Built for Every Learner Layer

The neuroinclusive layer should be a major student-facing differentiator, but it must be framed carefully. Do not market it as special-needs remediation. Market it as intelligent access design for serious learning.

Learner Need	Student Academy Support	Parent-Facing Message
ADHD / executive function	Movement transitions, visual timers, writing sprints, checklists	Your child needs better task architecture, not lower expectations.
Dyslexia / reading fatigue	Audio support, text-to-speech, guided annotation, chunked authentic text	We preserve serious texts while reducing decoding overload.
Anxiety-sensitive learners	No cold-calling, private reflection, rehearsal before speaking	Confidence grows when participation is structured safely.
Autistic learners	Visual agendas, explicit transitions, concrete roles, emotion mapping	Structure reduces hidden classroom ambiguity.
Twice-exceptional learners	Advanced questions with flexible output and reduced transcription burden	High ability and learning difficulty can exist together.

11. DRE Student Access Model

The Digital Reasoning Engine should not be sold as a general learning app. It should be sold as a structured reasoning scaffold that helps students build claims, organize evidence, map arguments, and collect portfolio evidence.

DRE Tier	Student Function	Recommended Packaging
Read-Only / Explorer	Prompt cards, Thinking Cycle guides, sample responses	Lead magnet or Starter bundle
Builder	Weekly CEIW scaffolds, guided prompts, progress tracker	Core Academy included
Scholar	Argument mapping, feedback cycles, monthly portfolio report	Advanced Academy included
Academy Plus	DRE plus live coaching, portfolio review, parent summary	Premium package

DRE positioning rule	Never position DRE as replacing a teacher. Position it as making reasoning visible, structured, and reviewable.
----------------------	---

12. Pricing Architecture

Offer	Vietnam / ASEAN Logic	Global Online Logic	Notes
Student Thinking Diagnostic	300,000-700,000 VND	US\$49-99	May be free/discounted during launch
Starter Academy	199,000-399,000 VND/month	US\$19-39/month	Entry and trust-building tier
Core Academy	399,000-799,000 VND/month	US\$39-69/month	Main subscription product
Advanced Academy	599,000-1,500,000 VND/month	US\$79-129/month	Higher academic value
IELTS Reasoning Lab	2,000,000-8,000,000 VND per cycle	US\$199-899 per cycle	Premium cohort
1:1 Academic Coaching	700,000-1,500,000 VND/session	US\$75-150/session	Scarce, not default

13. Acquisition Funnel

Funnel	Lead Magnet	Conversion Event	Paid Offer
Parent Academic Confidence Funnel	5 Signs Your Child Needs Academic English, Not More Grammar	Student Thinking Diagnostic	Core or Advanced Academy
IELTS Funnel	Why IELTS Templates Fail at Band 7	Free writing sample review	IELTS Reasoning Lab
International School Funnel	Why Fluent Students Still Struggle with Literature Essays	Text-analysis diagnostic	Academic Thinker Track
Neuroinclusive Parent Funnel	Your Child May Not Be Lazy: The Task May Be Poorly Structured	Parent consultation + diagnostic	Built for Every Learner Track
Homeschool Funnel	Literature-Based English Portfolio Starter Kit	Portfolio review call	Portfolio Academy

14. Delivery Model: Lean First, Platform Later

The first version should not wait for a full software platform. The DRE can be simulated through templates and structured feedback while the market validates willingness to pay.

Function	Minimum Viable Tool	Later Platform Version
Landing page	Jurassic English™ Student Academy page	Dedicated enrollment funnel
Payment	Stripe, PayPal, bank transfer, local payment links	Integrated subscription billing
Diagnostic	Google Form + rubric + Zoom	Automated diagnostic dashboard
Learning hub	Google Classroom / Notion / Drive	Student portal
DRE tasks	Structured templates and rubrics	Interactive DRE app
Live delivery	Zoom / Google Meet	Integrated virtual classroom
Parent reports	PDF or email report	Automated parent dashboard

15. 90-Day Launch Roadmap

Phase	Days	Deliverables	Success Metric
Define	1-15	Landing page, diagnostic rubric, pricing table, parent report template	Clear offer and CTA ready
Build Funnel	16-30	Lead magnet, 5 social posts, 2 parent articles, 1 video script	First leads generated
Recruit Pilot	31-45	6-10 Core students, 4-6 IELTS Lab students	Paid or committed pilot cohort
Deliver Pilot	46-75	Weekly sessions, CEIW samples, speaking evidence, parent updates	Visible learner progress evidence
Formalize	76-90	Case study, refined pricing, next cohort page, testimonial assets	Repeatable sales cycle

16. Messaging Architecture

Audience	Primary Pain	Lead Message	CTA
Parent of primary learner	Wants speaking confidence and strong foundation	Build English confidence through stories, speaking, and reasoning.	Book a Student Thinking Diagnostic
Parent of secondary learner	Worries about essays and international school readiness	Move from English fluency to academic English thinking.	Start the Academic Readiness Diagnostic
Self-directed IELTS student	Needs score and confidence	Stop memorizing templates. Build arguments that survive pressure.	Join IELTS Reasoning Lab
Neuroinclusive parent	Child is intelligent but blocked	We do not lower expectations. We build better access.	Request Built for Every Learner review
Homeschool parent	Needs credible curriculum path	A literature-based English pathway with portfolio evidence.	Request portfolio consultation

17. Risk Control

Risk	Why It Matters	Control
Brand conflict with schools	Schools may think parents can bypass licensing	Make Student Academy supplemental; reserve full framework for institutions
Too many offers	Confuses buyer and weakens conversion	Launch only diagnostic, Core Academy, IELTS Lab first
Overclaiming outcomes	Damages credibility	Use evidence language: samples, progress reports, portfolios
App-first distraction	Delays revenue	Simulate DRE first; build platform after paid validation
Generic English-center messaging	Makes JE invisible in Vietnam market	Lead with fluency + academic reasoning + authentic literature
Neuroinclusive language misunderstood	May sound remedial	Frame as access design for serious learners

18. Final Business Model Recommendation

Adopt this model	Create Jurassic English™ Student Academy as the direct-student arm of the brand. Start with a diagnostic-led funnel, one recurring Academy subscription, and one premium IELTS/Academic Reasoning cohort. Use the v3.5 framework as the intellectual engine, but express the value in parent/student language: confidence, fluency, writing, reasoning, portfolio evidence, and academic future readiness.	
Priority	Action	Reason
1	Publish Student Academy landing page	Separates B2C from institutional sales
2	Launch Student Thinking Diagnostic	Creates proof and conversion pathway
3	Run Core Academy pilot	Validates recurring revenue

Priority	Action	Reason
4	Run IELTS Reasoning Lab pilot	Generates premium cash flow and testimonials
5	Collect portfolio evidence	Builds credibility for parents and schools

19. Source Basis

This business document was expanded using the following Jurassic English / WorldWide Learning source themes from Google Drive: v3.5 Thought Architecture; Authentic Literature and prohibition of simplification; Neuroinclusive Infrastructure and Regulation-Before-Reasoning; Universal Design for Learning; DRE positioning; CEIW; market differentiation; Vietnam positioning; parent/student buyer profiles; and institutional-versus-student offer architecture.

20. Confidence, Assumptions, and Blind Spots

Strategic reading: proceed with the Student Academy model, but treat the first 90 days as market validation, not final platform deployment. The model is strongest when launched through diagnostics, cohorts, portfolio evidence, and parent-visible learner progress.

Category	Professional Assessment	Action / Control
Confidence	High confidence: 0.86. The model is well supported by v3.5 source logic: Thought Architecture, authentic literature, CEIW writing, DRE scaffolding, parent/student buyer paths, and the gap between fluency and academic English.	Launch, but validate pricing, acquisition cost, and retention before scaling.
Core assumptions	The Student Academy remains supplemental to the School Framework; parents will buy visible progress; cohorts can prove outcomes before full software build; DRE can be simulated through structured templates during validation.	Keep B2C language separate. Start lean: diagnostic + Core Academy + IELTS Lab.
Blind spot 1: channel conflict	Schools may perceive the student offer as a cheaper substitute for institutional licensing.	Brand it as individual enrichment. Reserve curriculum governance, teacher training, QA, and licensing for schools.
Blind spot 2: product sprawl	Too many tiers, tracks, and promises could weaken conversion and confuse parents.	Launch only 3 offers first: Diagnostic, Core Academy, IELTS / Academic Reasoning Lab.
Blind spot 3: proof gap	Claims about reasoning, confidence, and writing improvement need visible evidence, not only strong positioning.	Collect before/after writing samples, speaking clips, CEIW artifacts, DRE screenshots, reports, and testimonials.
Blind spot 4: market localization	Vietnam / ASEAN families may value IELTS, international school readiness, and confidence more than abstract critical-thinking language.	Translate the message into parent outcomes: speaking, essays, exam readiness, confidence, and portfolio proof.
Decision rule	Continue scaling only if pilot signals are strong: diagnostic-to-paid conversion, cohort completion, parent satisfaction, visible student artifacts, and willingness to renew.	Review after 90 days. Expand only the offer with the strongest evidence and cleanest revenue signal.

Validation checkpoint: do not invest in a full platform until paid pilots produce repeatable conversion, completion, and portfolio-evidence signals.
