WORLD WISE LEARNING · JURASSIC ENGLISH™

Jurassic English™

Pilot Programme Overview Pack

A governed 6–8 week institutional evaluation framework for schools, academies, and training centres. Structured for academic leadership, board-level review, and commercial adoption decisions.

6–8 WEEK EVALUATION PATHWAY

AUDIT SPRINT › **PILOT PROGRAMME** › EXECUTIVE REVIEW › LICENSING / SCALE

SECTION 01

What the Pilot Is

01

The Jurassic English Pilot Programme is a structured institutional evaluation framework — not a sample lesson, not a free trial, and not an open-ended classroom experiment.

The pilot creates a controlled evidence base around a defined learner group, named implementation roles, agreed decision gates, and a final rollout recommendation. It is built for procurement, academic leadership, and investor-grade proof of adoption readiness.

Four Elements Every Pilot Contains

ELEMENT	WHAT IT MEANS
Scoped Cohort	A specific learner group, class level, or programme segment agreed before launch. Not the whole school. Not a general impression.
Implementation Plan	A practical delivery plan aligned to the institution's timetable, teacher capacity, and standards context.
Teacher Preparation	Orientation and delivery guidance before classroom use begins, so the evidence produced is meaningful and replicable.
Evidence Collection	Structured capture across student work, teacher fidelity, progression fit, and operational load throughout the pilot window.

CONFIDENTIAL · PREPARED FOR INSTITUTIONAL REVIEW · JURASSIC ENGLISH / WORLD WISE LEARNING

What the Pilot Is Not

Not a free trial

The pilot is a commercial engagement with defined scope, named roles, and a final recommendation. It requires a real institutional commitment and produces a real deliverable.

Not an open-ended impression

Pilot outcomes are measured against agreed criteria, not general enthusiasm. The final report reflects structured evidence, not subjective teacher feedback alone.

Not a replacement for scoping

The pilot begins after institutional readiness is confirmed. If an institution is not yet ready, we recommend a smaller entry point — an Audit Sprint or advisory session — first.

Not a one-size decision

Three commercial pathways (Advisory-First, Institutional MVP, Scale Readiness) mean the pilot is scoped to fit the institution's actual readiness, not a fixed template.

SECTION 02

Who the Pilot Is For

02

The pilot is most useful when a buyer has moved beyond general interest and needs a structured way to test fit, feasibility, and implementation risk before committing to full licensing or multi-class deployment.

School Leaders

You need board-ready evidence before approving a new curriculum pathway.

Use the pilot to evaluate whether Jurassic English supports your standards, academic positioning, teacher capacity, and parent-facing curriculum story.

Academic Directors

You need to know whether the methodology holds up in live classrooms.

Use the pilot to assess teacher readiness, lesson fidelity, progression logic, and the quality of student reasoning evidence your classes can produce.

Centre Owners

You need a low-risk way to differentiate before investing in full rollout.

Use the pilot to test commercial fit, operational load, teacher adoption, and whether the programme creates a defensible market position.

Qualifying Criteria

An institution is ready for a pilot when they can confirm all of the following:

CRITERION	WHY IT MATTERS
Named Pilot Sponsor	A senior decision-maker who can protect the pilot mandate and receive the final recommendation.
Defined Learner Group	A specific cohort that can be dedicated to the pilot. Without this, evidence cannot be attributed reliably.
Protected Timeline	A 6–8 week window that does not conflict with exams, major events, or teacher absences.
Teacher Champion	At least one teacher who is willing and available for the orientation and implementation phases.
Commercial Intent	A genuine adoption decision — not research, not general curiosity. The pilot is a procurement tool, not a demonstration.

If your institution does not yet meet all qualifying criteria, we will recommend a more appropriate entry point — such as an Audit Sprint or advisory session — before moving to a pilot.

SECTION 03

The 4-Phase Structure

03

Four phases. Four decision gates. One adoption recommendation.

Every pilot follows the same operating logic: prepare the institution, activate classroom delivery, measure implementation evidence, then decide the correct commercial pathway. Exact scope depends on institution size and readiness.

01 SETUP
Scope and Readiness Review

Define the institutional problem, pilot boundary, and success criteria before any classroom activity begins.

→Pilot scope note
→Readiness checklist
→Success measures agreed

Gate: Proceed only if the institution can name accountable roles, protect the pilot window, and supply baseline context.

02 WEEK 1
Teacher and Admin Orientation

Prepare the delivery team to implement the methodology consistently enough for evidence to be meaningful.

→Orientation record
→Delivery protocol
→Evidence capture plan

Gate: Proceed only if the teacher team can demonstrate delivery readiness and the sponsor accepts the evidence protocol.

03 WEEKS 2–7
Guided Classroom Implementation

Run the pilot in live classrooms while measuring academic value, teacher fidelity, and operational feasibility.

→Evidence log
→Teacher fidelity notes
→Operational risk register

Gate: Continue, narrow, or pause if evidence quality, teacher capacity, or operational load falls outside agreed threshold.

04 WEEK 8
Pilot Review and Rollout Recommendation

Convert pilot evidence into a clear institutional decision and commercially realistic next step.

→Pilot summary
→KPI block
→Rollout recommendation

Gate: Select next pathway: advisory continuation, institutional MVP, scale readiness, revised pilot, or no rollout.

SECTION 04

What Gets Measured · Deliverables · Governance

04

WHAT GETS MEASURED

The pilot is judged by evidence, not enthusiasm. Each pilot produces a practical evidence base that helps institutional buyers decide whether Jurassic English should move into a larger implementation pathway.

Student Reasoning Evidence
Comprehension, evidence use, justification, discussion, and written response quality

Teacher Fidelity
Consistency of Thinking Cycle delivery, questioning routines, and feedback expectations

Progression Fit
Level match, language demand, text complexity, and assessment alignment

Operational Load
Scheduling, preparation time, administrator oversight, and parent communication

Commercial Readiness
Whether the programme supports a credible full rollout or licensing pathway

WHAT INSTITUTIONS RECEIVE

- ✓ Pilot scope and readiness note
- ✓ Evidence capture framework
- ✓ Student reasoning evidence sample review
- ✓ Operational load assessment
- ✓ Teacher orientation and delivery protocol
- ✓ Weekly review notes and risk register
- ✓ Teacher fidelity and implementation observations
- ✓ Final pilot report with rollout recommendation

GOVERNANCE ROLES

Pilot Sponsor
Senior institutional owner who protects the pilot mandate, confirms commercial intent, and receives the final recommendation.

Academic Lead
Curriculum or academic decision-maker responsible for standards fit, learner placement, and interpretation of evidence.

Implementation Lead
Operational owner who coordinates timetable, materials access, communications, and pilot administration.

Teacher Champion
Classroom practitioner who models adoption, surfaces delivery friction, and supports teacher feedback quality.

SECTION 05

Commercial Pathways and Next Step

05

Three pilot pathways for different levels of readiness. The commercial model keeps adoption low-risk while preserving seriousness.

Each pathway is scoped before launch and designed to produce an evidence-backed decision, not an open-ended trial.

ENTRY LEVEL
Advisory-First Pilot

Best for institutions still clarifying curriculum problem, standards pressure, or internal readiness.

Consultative pilot design, materials review, leadership advisory, and limited implementation planning before classroom activation.

CORE PATHWAY — MOST COMMON
Institutional MVP Pilot

Best for schools or centres ready to test one learner group, one level, or one defined programme segment.

A contained classroom pilot with teacher orientation, evidence capture, review cadence, and final rollout recommendation.

SCALE TRACK
Scale Readiness Pilot

Best for multi-class, multi-campus, or school-group buyers evaluating a wider adoption pathway.

Pilot architecture focused on governance, teacher consistency, operational load, and hub-and-spoke expansion planning.

AUDIT SPRINT › **PILOT PROGRAMME** › EXECUTIVE REVIEW › LICENSING / SCALE

Request a Pilot Consultation

Use this pathway if your institution is ready to evaluate Jurassic English in a defined, evidence-producing pilot. If you are still exploring fit, we recommend beginning with a Discovery Call instead.

Pilot scope is confirmed before any implementation begins. We will recommend a smaller entry point if your institution is not yet ready for a full pilot.
