What you get in this pack

Five complete Teacher Packs, one for each level, so you can teach any learner from age 4 upwards and move them on when they are ready.

5	**Teacher Packs, Levels 1–5** Each is a licensed PDF with the syllabus, the manual and forty lesson plans, with a contents page.
769	**printable A4 pages in the five pack PDFs** 155 + 146 + 147 + 159 + 162 pages. This guide is a sixth, shorter PDF.
200	**lesson plans** Forty per level, each with aims, materials, a timed four-phase procedure, differentiation, an assessment rubric, closure and homework.
5	**Teacher Implementation Manuals** The method, the four stages of the Thinking Cycle, classroom routines, assessment and troubleshooting, one per level.
5	**Student & Family Syllabi** Course aims, core texts, term-by-term plan and the reasoning rubric. The full text of all five is in this guide.
80	**editable Google Docs** The same material as Google Docs in the buyer's Drive folders, so you can adapt wording for your classes.

The set books are not included and none is quoted. Use copies your school or library owns.

Licence. One teacher or tutor. Five packs bought separately would cost 3.450.000₫. Printable, single-buyer licence. No resale, sharing, uploading or redistribution. © 2026–2027 WorldWise Learning and JurassicEnglish.com.

SAMPLE · jurassicenglish.com/products

Lesson 11: Excavation — Discovering Feeling Fossils in Owl Babies

Target Grade Level / Subject / Duration

Grade Level: Ages 4–8 (CEFR Pre-A1 → A1)

Subject: English Language Arts (Jurassic English™ Level 1: Foundation)

Duration: 40 minutes

Overall Learning Goals

Students will transition into a regulated state of physiological readiness (the "Green Zone") to actively listen to a weighty literary text about separation and wait time. They will excavate "Word Fossils" from the narrative — vocabulary that captures the somatic experience of anxiety and the relief of return.

Specific Learning Objectives

1. Students will independently or semi-independently execute the "Butterfly Hug" self-regulation protocol to achieve physiological readiness.
2. Students will identify and extract at least one specific "Word Fossil" (e.g., *worried, scared, dark, alone, brave*) from the read-aloud text.
3. Students will accurately connect their identified "Word Fossil" to a corresponding visual representation (Emotion Icon or book illustration of Sarah, Percy, or Bill).

Materials Needed

- Core Text: *Owl Babies* by Martin Waddell (physical book and/or audio-visual representation).
- **Emotion Icons:** Laminated cards featuring clear facial expressions or physical states (worried, scared, alone, brave, relieved/happy).
- **Word Wall Materials:** Blank cards, thick markers, and designated wall space.
- **Fidget Fossils:** Small, smooth stones provided for students requiring tactile neurodiverse accommodations.
- **Nature Anchor:** A visible natural object in the classroom — for this text, ideally a small branch or piece of bark to evoke the owls' tree.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Detailed Procedure / Step-by-Step Outline

Phase 1: Regulation-Before-Reasoning (0–5 minutes)

- **Activity:** The Butterfly Hug Protocol.
- **Teacher Scripting Prompt:** "*Paleontologists, today we are visiting a dark forest where three baby owls are waiting. Before we can sit with them in the dark, we must get our brains and bodies into the Green Zone. Cross your arms, hook your thumbs, and tap left, right, left, right. Breathe quietly with me for 60 seconds.*"
- **Student Task:** Students perform the Butterfly Hug, focusing on bilateral tapping and silent breathing to regulate their autonomic nervous systems.
- **Action:** Distribute "Fidget Fossils" to ADHD-profile and high-anxiety students. Note: the *Owl Babies* text is emotionally activating for some children with separation anxiety — anchor objects are essential.

Phase 2: The Dig Site — Active Reading (5–15 minutes)

- **Activity:** Read-aloud of *Owl Babies*.
- **Teacher Scripting Prompt:** "*Today, we are looking for Word Fossils — words that tell us how the three baby owls feel inside their bodies while they wait for their mother. Listen to Sarah, Percy, and little Bill. When you hear a feeling, touch your nose.*"
- **Student Task:** Active listening. Students use the tactile gesture (touching nose) when identifying a target word.
- **Action:** Read the text slowly. Emphasize target BICS/CALP crossover vocabulary: *worried, scared, dark, alone, brave, soft.* Pay particular attention to the smallest owl's repeated cry for his mother as the somatic anchor for anxiety. Do not stop for grammar instruction.

Phase 3: Excavation — The Word Fossil Hunt (15–30 minutes)

- **Activity:** Identifying and claiming vocabulary.
- **Teacher Scripting Prompt:** "*Paleontologists, what Word Fossils did we find in the dark layers of this story? What words tell us how the owls felt while they waited?*"
- **Student Task:** Students verbally share a feeling word they noticed in the text.
- **Teacher Move (Marking):** When a student says "Worried" or "Scared," the teacher executes the Accountable Talk "Marking" move: "*You found a fossil. 'Worried' is what your tummy feels when you don't know if someone is coming back. Let's put that on our Word Wall.*" Write the word clearly on a card and place it on the board.
- **Action:** Continue until 3–4 key feeling words are "excavated" and placed on the Word Wall. Aim for at least one Tier 2 fossil (e.g., *worried* or *brave*) beyond the basic *sad/happy*.

Phase 4: Linguistic Connection & UDL Expression (30–35 minutes)

- **Activity:** Connecting text to visual evidence (A1 Indicator prep).
- **Teacher Scripting Prompt:** "*I am holding up a picture of little Bill on the branch, calling out for his mother. Which Word Fossil from our wall matches Bill's face and body?*"
- **Student Task:** Students point to or verbally identify the correct Word Fossil (e.g., "Worried" or "Scared") that matches the provided Emotion Icon or book illustration.

SAMPLE · jurassicenglish.com/products

Lesson 13: Excavation — Explicit Evidence and Causality in The Iron Man

Target Grade Level / Subject / Duration

Grade Level: Ages 8–10 (CEFR A1 → A2)

Subject: English Language Arts (Jurassic English™ Level 2: Development)

Duration: 45 minutes

Overall Learning Goals

Students will open the *Iron Man* dig site by distinguishing explicit text from inference. Ted Hughes's opening — the Iron Man at the cliff edge, the fall, the reassembly — is one of the most evocative passages in 20th-century children's literature. Today's job: separate what the text *actually says* from what the reader *imagines* and *fears*.

Specific Learning Objectives

1. Students will independently initiate the Butterfly Hug or Cool Down Pass.
2. Students will distinguish explicit textual statements from inferred meaning in Chapter 1 of *The Iron Man*.
3. Students will locate, highlight (blue), and cite (page + paragraph) at least three pieces of explicit evidence about the Iron Man's appearance and arrival.
4. Students will pass the Parrot Effect Check by orally interpreting cited evidence in their own words.

Materials Needed

- Core Text: *The Iron Man* by Ted Hughes (physical copies for all students).
- Audio version queued for Chapter 1 (the cliff fall and the reassembly).
- **Dual-coding highlighters** (Yellow / Blue).
- **Cool Down Passes** at the front desk.
- **Accountable Talk Cards** on student desks.
- An **"Explicit vs. Inferred" T-chart** projected or posted.

Detailed Procedure / Step-by-Step Outline

Phase 1: Regulation Transfer (0–7 minutes)

- **Activity:** Self-initiated regulation. Frame the new text.
- **Teacher Scripting Prompt:** "*New dig site today. The Iron Man is a story about something most people are afraid of — a giant they cannot understand. Some of you may feel a flicker of that fear yourself when we read. That is normal. Regulate now. Cool Down Passes are at the front.*"
- **Action:** Brief Butterfly Hug. Confirm Passes accessible.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Phase 2: The Dig Site — Reading for the Cliff Edge (7–22 minutes)

- **Activity:** Audio + text reading of Chapter 1.
- **Teacher Scripting Prompt:** "*Today we are looking for explicit evidence ONLY. We are not looking for what we think happened. We are looking for what Ted Hughes ACTUALLY wrote. Listen. Follow the text. Underline nothing yet.*"
- **Student Task:** Students follow physical text while audio plays through the Iron Man's appearance, the fall, and the reassembly.
- **Action:** Stop after the seagulls fly past the reassembled Iron Man and he walks into the sea.

Phase 3: Excavation — Locating Explicit Evidence (22–37 minutes)

- **Activity:** Dual-coding and citation hunt.
- **Teacher Scripting Prompt:** "*I have three Claims. Prove each one with blue evidence. Citation required: page and paragraph. Claim 1 — 'The Iron Man is enormous.' Claim 2 — 'The Iron Man fell apart at the bottom of the cliff.' Claim 3 — 'The Iron Man put himself back together.' Find the explicit sentences. Show me the page.*"
- **Student Task:** Students scan, highlight in blue, and write the page/paragraph next to each highlighted sentence.
- **Teacher Move:** Press relentlessly: "*That's not the page. Show me the paragraph. Read the SENTENCE that proves my Claim. Don't summarize.*"
- **Explicit vs. Inferred check:** "*Does the text say 'the Iron Man was alive'? Or does it say something that we INFER means alive? Look carefully. The author's exact words matter.*"

Phase 4: The Parrot Effect Check (37–43 minutes)

- **Activity:** Verbal interpretation without the text in front.
- **Teacher Scripting Prompt:** "*Cover the book with your hand. In your own words: how did the Iron Man put himself back together? What did the text actually describe?*"
- **Student Task:** Students orally interpret the reassembly without peeking.
- **Teacher Move:** "*You said 'magic.' Did the text use the word 'magic'? Or did the text describe each piece finding the next piece? That is the difference between explicit and inferred.*"

Differentiation / Accommodations

- **Neuroinclusive (Dyslexia):** Audio runs the entire Phase 2. During Phase 3, pair the student with a peer who reads the target paragraph aloud while the dyslexic student locates the highlight. Pre-chunked text version available.
- **Neuroinclusive (ADHD):** Use Phase 3 as a movement break — student walks to a posted version of the chapter on the wall and highlights there. Chunk the three Claims into one at a time.
- **Neuroinclusive (Anxiety):** Strict No Cold Call. Whisper-prompt the page in advance. Allow the student to write the citation on a Post-it instead of speaking it.

Assessment & Rubric

Assessment Type: Formative Observational Assessment

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Lesson 13: Excavation — Subtextual Observation and the Threshold of Imagination in Bridge to Terabithia

Target Grade Level / Subject / Duration

Grade Level: Ages 10–12 (CEFR A2 → B1)

Subject: English Language Arts (Jurassic English™ Level 3: Expansion)

Duration: 45 minutes

Overall Learning Goals

Students will open the *Bridge to Terabithia* dig site by separating Katherine Paterson's explicit text from the dense subtext beneath it. The novel works almost entirely through implication — what Jess feels is rarely named, but always traceable through what he *does*. Today: train the eye for B1-level subtextual observation.

> ***Teacher Pre-Note:*** *This text moves toward a death by drowning. Today's lesson opens before that event. Frame the text honestly — students should know, in general terms, that loss is part of the story. The Cool Down Pass and Regulation Station are essential throughout this cycle. Co-teach with a counselor available if possible. The manual is clear: "Do not rescue them from the friction." That includes grief friction — but it does NOT mean ignoring it. It means scaffolding it, holding the standard, and trusting students to do the work.*

Specific Learning Objectives

1. Students will independently regulate and locate the Cool Down Pass.
2. Students will distinguish explicit text from inferential subtext in the opening chapters.
3. Students will locate, dual-code (yellow=explicit, blue=inferred), and cite at least three pieces of evidence — at least one of which requires inference to understand.
4. Students will articulate the difference between "what the text states" and "what the author implies" using B1 markers.

Materials Needed

- Core Text: *Bridge to Terabithia* by Katherine Paterson.
- Audio version queued for the opening chapters.
- **Dual-coding highlighters** (Yellow=explicit; Blue=inferred).
- **Cool Down Passes.**
- **Accountable Talk Reference Cards.**
- **B1 Interpretive Marker Poster.**
- **Regulation Station** at the back of the room with a quiet light and Fidget Fossils.
- **"Explicit vs. Subtext" T-chart** projected.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Detailed Procedure / Step-by-Step Outline

Phase 1: Regulation & Framing (0–8 minutes)

- **Activity:** Self-regulation; honest framing of the text.
- **Teacher Scripting Prompt:** "*This dig site is* Bridge to Terabithia*. The book is honest about loss. We will not pretend it isn't. The Regulation Station is open the entire 45 minutes. The Cool Down Pass is automatic — no permission needed. Today, before the harder pages, we read the opening — Jess running, Leslie arriving. Take 90 seconds for the Butterfly Hug if you need it.*"
- **Action:** Verify Regulation Station accessible. Honor any student who needs it.

Phase 2: The Dig Site — Reading the Opening (8–22 minutes)

- **Activity:** Audio + text reading of opening chapters.
- **Teacher Scripting Prompt:** "*Looking for two things today. EXPLICIT — what Paterson actually writes. INFERRED — what we understand without her writing it. She rarely tells you what Jess feels. She tells you what he does. The feeling is in the gap.*"
- **Student Task:** Follow audio with physical text.
- **Action:** Stop after Leslie wins the race.

Phase 3: Excavation — Subtextual Citation (22–37 minutes)

- **Activity:** Dual-coding the explicit/inferred distinction.
- **Teacher Scripting Prompt:** "*Three Claims. Citations required. Yellow for explicit; Blue for inferred. Claim 1 — 'Jess practices running every morning.' That should be EXPLICIT. Claim 2 — 'Jess is angry that Leslie won.' That is INFERRED — Paterson never says 'angry.' What did she write that proves it? Claim 3 — 'Jess and his father do not understand each other.' INFERRED. What evidence proves that without Paterson stating it directly?*"
- **Student Task:** Highlight in yellow OR blue depending on whether the citation is explicit or inferred. Cite page/paragraph.
- **Teacher Move:** "*You highlighted that in yellow. Look again. Did Paterson actually USE the word 'angry'? No? Then it's blue. The author IMPLIES anger. That is subtext.*"

Phase 4: B1 Marker Practice (37–43 minutes)

- **Activity:** Verbal articulation of the explicit/subtext difference.
- **Teacher Scripting Prompt:** "For your blue highlights, complete this sentence aloud to your shoulder partner: 'The author implies ___ because she writes ___.' Or: 'This evidence suggests ___ because the underlying assumption is ___.' Use the markers."
- **Student Task:** Pair practice using B1 markers.
- **Teacher Move:** "*Did you say 'the text says Jess is angry'? No, the text doesn't say that. Try: 'The author implies Jess is angry because she describes him kicking the dirt.' That's B1.*"

Differentiation / Accommodations

- **Neuroinclusive (Executive Dysfunction / ADHD):** Phase 3 movement — student walks to projected text on the wall and highlights physically. One Claim at a time.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Lesson 13: Excavation — Visual Rhetoric and Linguistic Deconstruction in Persepolis

Target Grade Level / Subject / Duration

- **Grade Level:** Ages 12–14 years
- **CEFR Level:** B1 → B2 (Conquering the B2 Plateau)
- **Subject:** English Language Arts (Jurassic English™ Level 4: Mastery)
- **Duration:** 45 minutes

Overall Learning Goals

Students open the *Persepolis* dig site and expand the Excavation toolkit. Marjane Satrapi's graphic memoir delivers argument through TWO simultaneous channels — words AND images. Today: deconstruct how the panel composition, the high-contrast black-and-white inking, and the child-narrator's voice operate together as a rhetorical mechanism. The text demands the reader analyze what the picture says that the caption cannot.

> ***Teacher Pre-Note:*** *This is the first text in the JE library that uses visual rhetoric as a primary argumentation channel. Anchor the historical context BEFORE opening the panel: the Iranian Revolution of 1979, the Shah's fall, the establishment of the Islamic Republic, the mandatory veil, the Iran-Iraq War. The manual is explicit: "Do not teach the text without its historical/political anchor."*

Specific Learning Objectives

1. Students will independently regulate.
2. Students will deconstruct at least one panel using a Visual Rhetoric Decoder — analyzing composition, contrast, framing, and the gap between image and caption.
3. Students will identify the rhetorical mechanism (Redefinition, Appeal to Fear, or Circular Logic) operating in the regime's language as Satrapi's child-narrator reports it.
4. Students will use B2 mechanism verbs (*illustrates, exposes, dismantles, manufactures*) to articulate how the dual visual-verbal channel functions.

Materials Needed

- Core Text: *Persepolis* by Marjane Satrapi (physical copies for all students).
- One-page historical anchor handout: Iran 1979 — the Shah's fall, the Revolution, the Islamic Republic, the veil decree, the Iran-Iraq War (1980–88).
- **Visual Rhetoric Decoder** (4-column graphic organizer: Panel composition / Caption text / Gap between image and caption / Rhetorical function).
- **Mechanism Verbs Reference Card.**
- Highlighters.
- Cool Down Passes.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

- Accountable Talk Reference Cards.

Detailed Procedure / Step-by-Step Outline

Phase 1: Regulation & Historical Anchor (0–8 minutes)

- **Teacher Scripting Prompt:** "*New text. New rhetorical channel. Before we open the book, the historical anchor is non-negotiable. Iran. 1979. The Shah falls. The Islamic Republic establishes the mandatory veil for all women regardless of religion. Eight years of war with Iraq begin in 1980. Marjane Satrapi was ten. She drew this memoir 20 years later, in black and white, in France. Read the anchor. We open the book in three minutes.*"
- **Student Task:** Read the anchor handout silently.

Phase 2: The Dig Site — Reading Panel as Rhetoric (8–22 minutes)

- **Activity:** Reading the opening panels with attention to the dual channel.
- **Teacher Scripting Prompt:** "*Open to 'The Veil' — the opening chapter. Read it twice. First read: follow the words. Second read: ignore the words. Look at JUST the panels. What does the composition tell you? Where does Satrapi place herself in the panels — center, edge, behind a line? What does the high-contrast black-and-white DO to the emotional register?*"
- **Student Task:** Two reads of the opening chapter.
- **Teacher Move:** "*In the first panel of 'The Veil,' Marjane is small in the corner of a row of identical figures. The composition does what Hutu Power radio did with words — it ERASES her individuality. The picture is the propaganda critique.*"

Phase 3: Excavation — The Visual Rhetoric Decoder (22–37 minutes)

- **Activity:** Filling in the Decoder for two panels.
- **Teacher Scripting Prompt:** "*Two panels. For each: Column A — describe the composition (who is centered, who is at the edge, what is in shadow). Column B — copy the caption or dialogue verbatim. Column C — what is the GAP between image and caption? Where do they contradict or amplify? Column D — name the rhetorical function: Redefinition, Appeal to Fear, or Circular Logic.*"
- **Student Task:** Decoder completion for two panels.
- **Teacher Move:** Demand precision. "*You wrote 'the panel is sad.' Reject. WHAT in the composition manufactures sadness? Is the figure off-center? Are the eyes drawn or absent? Specifics.*"

Phase 4: Mechanism Verb Practice (37–43 minutes)

- **Activity:** Verbal articulation using B2 mechanism verbs.
- **Teacher Scripting Prompt:** "Pair work. For each Decoder you completed: 'Satrapi's panel composition ILLUSTRATES the regime's Redefinition by ___.' Or: 'The gap between caption and image EXPOSES that ___ has been replaced with ___.' Use mechanism verbs only."

Differentiation / Accommodations

- **Support (B1):** Pre-completed Decoder for one panel (Columns A and B filled). Student completes Columns C and D. Pre-printed list of three rhetorical functions for the student to choose from.
- **Core (Target B2):** Independent Decoder for two panels.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

Lesson 13: Excavation — Syntactic Deconstruction and the Engineered Pleasure Lexicon of Brave New World

Target Grade Level / Subject / Duration

- **Grade Level:** Ages 14+ years
- **CEFR Level:** B2 → C1 (The Epistemological Threshold)
- **Subject:** English Language Arts (Jurassic English™ Level 5: Advanced)
- **Duration:** 45 minutes

Overall Learning Goals

Students open the *Brave New World* dig site by performing **Syntactic Excavation** on Huxley's engineered vocabulary. *Brave New World* is *1984*'s structural twin: where Orwell's regime suppresses, Huxley's seduces. Today: deconstruct the grammar of Huxley's neologisms (soma, feelies, Centrifugal Bumble-puppy, Fordian liturgy), the syntactic structure of the hatchery monologues, and the political function of the World State's slogans.

> ***Teacher Pre-Note:*** *Huxley wrote in 1931, ten years after his brother Julian (later UNESCO's first director-general) published The Stream of Life. The text predicted reproductive technology, mass psychotropic medication, and consumer-engineered identity decades before they arrived. Anchor: the eugenics movement of the 1920s–30s; Henry Ford's assembly-line ideology and Huxley's parodic Fordian religion; the Pavlovian conditioning research of the period.*

Specific Learning Objectives

1. Independent Ecological Regulation.
2. Catalog at least three engineered terms / syntactic structures in *Brave New World*, identifying the original concept each replaces and the political function performed.
3. Identify the rhetorical mechanism (primarily Redefinition + Pleasure-Enclosure; secondarily the World State's syntactic erasure of futurity through perpetual present-tense slogans — the regime's slogans that praise discarding over repairing).
4. Use C1 mechanism verbs (*sanitizes, displaces, enacts, manufactures, normalizes, fossilizes*) to articulate how the lexicon engineers consent.

Materials Needed

- Core Text: *Brave New World* by Aldous Huxley.
- One-page historical anchor: the 1920s–30s eugenics movement; Ford's *My Life and Work* (1922); Pavlovian conditioning research; Huxley's 1946 Foreword.
- **Engineered Lexicon Inventory** (3-column: Term or Syntactic Structure / Original concept replaced / Political function performed).
- C1 Mechanism Verbs Reference Card.

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

- Cool Down Passes.
- **Sensory Anchor** for Ecological Regulation.

Detailed Procedure / Step-by-Step Outline

Phase 1: Ecological Regulation & Anchor (0–8 minutes)

- **Teacher Scripting Prompt:** "*Anchor. One minute.*" [Reset.] "*Read the historical anchor. Huxley's regime does not torture. It dispenses soma. The book begins in a building that hatches and conditions humans. Today we read the language that makes this seem reasonable.*"

Phase 2: The Dig Site — Reading the Hatchery (8–22 minutes)

- **Activity:** Reading Chapter 1 (the Hatchery tour) and Chapter 3 (the Director's monologue / Henry Foster's lecture).
- **Teacher Scripting Prompt:** "*Listen for the engineered terms. List them. Listen for the syntactic structures — the present-tense slogans, the rhythmic conditioning chants (rhythmic chants that rhyme doubt away), the invocations that replace religious language with industrial language. The grammar IS the regime.*"

Phase 3: Excavation — The Engineered Lexicon Inventory (22–37 minutes)

- **Teacher Scripting Prompt:** "*Three terms or structures minimum. Column A: term (e.g., 'soma' / 'feelies' / 'pneumatic') or syntactic structure (e.g., the perpetual-present-tense slogans). Column B: what does it REPLACE? 'Soma' replaces what specifically — religion? grief? political dissent? Each is different. Column C: what political function does the new term PERFORM? Mechanism verbs.*"
- **Student Task:** Inventory completion.
- **Teacher Move:** Press: "*You wrote 'soma replaces religion.' Press one level. Soma is dispensed at the end of each workday. It produces euphoria. It eliminates dreams. It functions as a SHORT-TERM SUPPRESSANT of the cognitive states from which dissent emerges. The new word does the work the old institutions used to do — but more efficiently.*"

Phase 4: Mechanism Verb Practice (37–43 minutes)

- **Teacher Scripting Prompt:** "Pair work. 'Huxley's Redefinition of [concept] as [engineered term] DISPLACES the human capacity for ___ by ___.' C1 verbs only."

Differentiation / Accommodations

- **Support (B2):** Pre-completed Inventory for one term; student completes two more.
- **Core (Target C1):** Independent Inventory of three terms or structures.
- **Extension (C1+ Mastery / Authorial Mimicry):** Coin one Huxleyan term that the World State could deploy that Huxley did not. Annotate what it would replace, what political function it would perform, and what existing 21st-century technology already does this work.
- **Neuroinclusive (Dyslexia):** Reverse-Engineering — provide the Inventory in pre-cut strips for physical arrangement.
- **Neuroinclusive (ADHD):** Host role — annotate which classmates' Inventories most precisely identify the political function.
- **Neuroinclusive (Anxiety):** Asynchronous Inventory submission.
