Lesson 7: The Justification — Building the "Because" Bridge for Max's Choice 48
Lesson 8: The Impact — The Exit Drawing and Ecological Connection to Max's World 51
Lesson 9: Excavation — Discovering Feeling Fossils in The Giving Tree 54
Lesson 10: Evaluating the Boy's Choice 57

PART D · LESSON PLANS 11–40 61

Lesson 11: Excavation — Discovering Feeling Fossils in Owl Babies 62
Lesson 12: Strata — Evaluating the Owls' Wait 66
Lesson 13: The Justification — Building the "Because" Bridge for the Owls 70
Lesson 14: The Impact — The Exit Drawing and Ecological Connection to the Owl Family 73
Lesson 15: Excavation — Discovering Feeling Fossils in Frog and Toad are Friends 76
Lesson 16: Strata — Evaluating Frog's Choice to Wake Toad 79
Lesson 17: The Justification — Building the "Because" Bridge for Frog and Toad 82
Lesson 18: The Impact — The Exit Drawing and Ecological Connection to Friendship in Nature 85
Lesson 19: Excavation — Discovering Feeling Fossils in The Rainbow Fish 88
Lesson 20: Strata — Evaluating the Rainbow Fish's Choice to Share His Scales 91
Lesson 21: The Justification — Building the "Because" Bridge for Rainbow Fish 94
Lesson 22: The Impact — The Exit Drawing and Ecological Connection to the Sea 97
Lesson 23: Excavation — Discovering Feeling Fossils in Tiddler 100
Lesson 24: Strata — Evaluating Tiddler's Storytelling 103
Lesson 25: The Justification — Building the "Because" Bridge for Tiddler 106
Lesson 26: The Impact — The Exit Drawing and Ecological Connection to Imagination in Nature 109
Lesson 27: Excavation — Discovering Feeling Fossils in Stick Man 112
Lesson 28: Strata — Evaluating the World's Treatment of Stick Man 115
Lesson 29: The Justification — Building the "Because" Bridge for Stick Man 118
Lesson 30: The Impact — The Exit Drawing and Ecological Connection to Belonging 121
Lesson 31: Excavation — Discovering Feeling Fossils in The North Wind and the Sun 124
Lesson 32: Strata — Evaluating Who Won the Contest 127
Lesson 33: The Justification — Building the "Because" Bridge for the Wind and Sun 130
Lesson 34: The Impact — The Exit Drawing and Ecological Connection to Weather 133
Lesson 35: Excavation — Discovering Feeling Fossils in Grandad's Island 136
Lesson 36: Strata — Evaluating How Syd Carries His Grandad 139
Lesson 37: The Justification — Building the "Because" Bridge for Syd 142
Lesson 38: The Impact — The Exit Drawing and Ecological Connection to Memory in Nature 145

What you get in this pack

Everything you need to plan and teach the course: the syllabus, the method, and forty lesson plans built on the Jurassic Thinking Cycle (Excavation, Strata, Justification, Impact).

155	**printable A4 pages** This licensed PDF: syllabus, manual and all forty lesson plans, with a contents page.
40	**lesson plans** Each with aims, materials, a timed four-phase procedure, differentiation, an assessment rubric, closure and homework.
1	**Teacher Implementation Manual** The method, the four stages of the Thinking Cycle, classroom routines, assessment and troubleshooting.
1	**Student & Family Syllabus** Course aims, core texts, term-by-term plan and the four-level reasoning rubric.
17	**editable Google Docs** The same material as Google Docs in the buyer's Drive folder, so you can adapt wording for your classes.

The set books are not included and none is quoted. Use copies your school or library owns.

Licence. One teacher or tutor. Printable, single-buyer licence. No resale, sharing, uploading or redistribution.

1. Introduction to Jurassic English™ Level 1

1.1 Mission Statement: The Genesis of Thought

At Level 1: Foundation, our mission is not the mastery of syntax, but the architecture of the internal world. For learners aged 4–8, English is introduced not as a set of rules to be memorized, but as a high-precision tool for "Excavating" human experience. We aim to move learners from passive reception to active **Cognitive Academic Language Proficiency (CALP)** by treating feelings as "Word Fossils" that carry objective intellectual weight.

1.2 Pedagogical Positioning: The Physiological Precondition

Level 1 occupies a unique space in the Jurassic English™ (JE) ecosystem. While higher levels focus on systemic critique and postcolonial satire, Level 1 focuses on the **Physiological Precondition for Reasoning**. We operate on the principle that a dysregulated nervous system cannot access the higher-order thinking required for literary analysis. Therefore, Level 1 is a curriculum of "Regulated Reasoning."

1.3 Standards Alignment: CEFR Pre-A1 → A1 & CCSS Anchors

Level 1 is meticulously mapped to international standards to ensure institutional rigor and accountability.

Standard	Level 1 Descriptor	JE Instructional Evidence
CEFR Pre-A1	Can recognize familiar words and very basic phrases.	Identification of "Feeling Fossils" in core texts.
CEFR A1	Can use simple phrases and sentences to describe where they live and people they know.	Spoken CEIW: "I think the character is [Feeling] because [Evidence]."
CCSS.ELA-LITERACY.RL.K.1	With prompting and support, ask and answer questions about key details in a text.	Stage 2: Strata — "The Big Question" evaluation phase.
CCSS.ELA-LITERACY.SL.K.1	Participate in collaborative conversations with diverse partners about kindergarten topics.	Socratic "Circle Talk" using Accountable Talk markers.

1.4 Core Cognitive Progression: From Recall to Reasoning

The Foundation level initiates the vertical "Stratigraphy of Cognition" through a four-step evolutionary jump:

1. **Sensation:** Recognizing a physical feeling (Regulation).
2. **Recall:** Identifying the word associated with that feeling (Excavation).
3. **Causality:** Understanding the event that triggered the feeling (Strata).
4. **Justification:** Explicitly linking the feeling to the event through evidence (Justification).

1.5 World Wise Learning — Publisher Statement

World Wise Learning (WWL) recognizes that the Foundation level is the most critical layer in the student's intellectual "fossil record." Failure to establish emotional regulation and evidence-based reasoning here creates "cognitive gaps" in higher levels. This manual provides the granular guidance needed to ensure every Lesson 1

Lesson 11: Excavation — Discovering Feeling Fossils in Owl Babies

Target Grade Level / Subject / Duration

Grade Level: Ages 4–8 (CEFR Pre-A1 → A1)

Subject: English Language Arts (Jurassic English™ Level 1: Foundation)

Duration: 40 minutes

Overall Learning Goals

Students will transition into a regulated state of physiological readiness (the "Green Zone") to actively listen to a weighty literary text about separation and wait time. They will excavate "Word Fossils" from the narrative — vocabulary that captures the somatic experience of anxiety and the relief of return.

Specific Learning Objectives

1. Students will independently or semi-independently execute the "Butterfly Hug" self-regulation protocol to achieve physiological readiness.
2. Students will identify and extract at least one specific "Word Fossil" (e.g., *worried, scared, dark, alone, brave*) from the read-aloud text.
3. Students will accurately connect their identified "Word Fossil" to a corresponding visual representation (Emotion Icon or book illustration of Sarah, Percy, or Bill).

Materials Needed

- Core Text: *Owl Babies* by Martin Waddell (physical book and/or audio-visual representation).
- **Emotion Icons:** Laminated cards featuring clear facial expressions or physical states (worried, scared, alone, brave, relieved/happy).
- **Word Wall Materials:** Blank cards, thick markers, and designated wall space.
- **Fidget Fossils:** Small, smooth stones provided for students requiring tactile neurodiverse accommodations.
- **Nature Anchor:** A visible natural object in the classroom — for this text, ideally a small branch or piece of bark to evoke the owls' tree.

Detailed Procedure / Step-by-Step Outline

Phase 1: Regulation-Before-Reasoning (0–5 minutes)

- **Activity:** The Butterfly Hug Protocol.
- **Teacher Scripting Prompt:** "*Paleontologists, today we are visiting a dark forest where three baby owls are waiting. Before we can sit with them in the dark, we must get our brains and bodies into the Green Zone. Cross your arms, hook your thumbs, and tap left, right, left, right. Breathe quietly with me for 60 seconds.*"
- **Student Task:** Students perform the Butterfly Hug, focusing on bilateral tapping and silent breathing to regulate their autonomic nervous systems.
- **Action:** Distribute "Fidget Fossils" to ADHD-profile and high-anxiety students. Note: the *Owl Babies* text is emotionally activating for some children with separation anxiety — anchor objects are essential.

Phase 2: The Dig Site — Active Reading (5–15 minutes)

- **Activity:** Read-aloud of *Owl Babies*.
- **Teacher Scripting Prompt:** "*Today, we are looking for Word Fossils — words that tell us how the three baby owls feel inside their bodies while they wait for their mother. Listen to Sarah, Percy, and little Bill. When you hear a feeling, touch your nose.*"
- **Student Task:** Active listening. Students use the tactile gesture (touching nose) when identifying a target word.
- **Action:** Read the text slowly. Emphasize target BICS/CALP crossover vocabulary: *worried, scared, dark, alone, brave, soft.* Pay particular attention to the smallest owl's repeated cry for his mother as the somatic anchor for anxiety. Do not stop for grammar instruction.

Phase 3: Excavation — The Word Fossil Hunt (15–30 minutes)

- **Activity:** Identifying and claiming vocabulary.
- **Teacher Scripting Prompt:** "*Paleontologists, what Word Fossils did we find in the dark layers of this story? What words tell us how the owls felt while they waited?*"
- **Student Task:** Students verbally share a feeling word they noticed in the text.
- **Teacher Move (Marking):** When a student says "Worried" or "Scared," the teacher executes the Accountable Talk "Marking" move: "*You found a fossil. 'Worried' is what your tummy feels when you don't know if someone is coming back. Let's put that on our Word Wall.*" Write the word clearly on a card and place it on the board.
- **Action:** Continue until 3–4 key feeling words are "excavated" and placed on the Word Wall. Aim for at least one Tier 2 fossil (e.g., *worried* or *brave*) beyond the basic *sad/happy*.

Phase 4: Linguistic Connection & UDL Expression (30–35 minutes)

- **Activity:** Connecting text to visual evidence (A1 Indicator prep).
- **Teacher Scripting Prompt:** "*I am holding up a picture of little Bill on the branch, calling out for his mother. Which Word Fossil from our wall matches Bill's face and body?*"
- **Student Task:** Students point to or verbally identify the correct Word Fossil (e.g., "Worried" or "Scared") that matches the provided Emotion Icon or book illustration.

Differentiation / Accommodations

- **Neuroinclusive (ADHD):** Provide a "Fidget Fossil" to hold during the 40-minute thinking block. Allow standing during Phase 3 if the student remains engaged in the "hunt."
- **Neuroinclusive (Anxiety):** *Owl Babies* may activate students with separation anxiety. Use the "Safe Start" — the teacher models the first Excavation. Have a quiet "Regulation Station" nearby in case a student needs a longer reset. Never cold-call an anxious student during the Word Hunt.
- **Support Tier:** Provide students with pre-selected feeling cards with pictures (worried face, brave face) on their desks. They can hold up the picture card when they hear the matching word.
- **Core Tier:** Students must provide a spoken Claim plus visual evidence (e.g., pointing at the book and saying, "Bill is scared").
- **Extension Tier:** Prompt advanced reasoning: "*Which baby owl feels the MOST worried? How can we tell from the picture?*" (Students may notice Bill's smaller size, his repeated lines, or his position on the branch.)

Assessment & Rubric

Assessment Type: Formative Observational Assessment

Specific Learning Objective	Emerging (Level 1)	Developing (Level 2)	Proficient (Level 3)	Mastery (Level 4)
1. Regulation Protocol	Requires teacher physical prompting; struggles to remain quiet during a text about separation.	Initiates Butterfly Hug but stops before 60 seconds; mild distraction.	Successfully executes the Butterfly Hug for 60 seconds independently.	Executes protocol and uses Fidget Fossil to sustain focus through emotionally activating content.
2. Excavate Word Fossil	Cannot identify a feeling word. Focuses only on plot (e.g., "The owls are in a tree").	Points to Bill when asked how he feels, but cannot recall the English vocabulary word.	Independently verbally identifies at least one correct feeling word (e.g., "Worried") during the hunt.	Identifies multiple feeling words and spontaneously uses them in a full sentence.
3. Visual Connection	Unable to match the spoken word to the provided picture card.	Matches the word to the picture only with direct 1-on-1 teacher modeling.	Successfully points to the correct visual Emotion Icon when the Word Fossil is spoken.	(Extension) Identifies which owl feels most strongly and explains why using a picture detail.

Closure / Reflection (35–40 minutes)

- **Activity:** The 2-Minute Outdoor Reset (Ecological Application).
- **Procedure:** Lead the students outside or to a large window.
- **Teacher Scripting Prompt:** "*The baby owls were waiting for their mother in a tree. Look at the trees outside. What lives in trees? Do you think the animals in those trees ever feel worried like Bill? How can we tell?*"

Licensed for one teacher / one centre. © Jurassic English

SAMPLE · jurassicenglish.com/products

- **Action:** Allow 1–2 minutes for observational answers to build cross-species awareness. Return to the classroom, review the newly built Word Wall, and preview that tomorrow (Lesson 12: Strata), the class will answer "The Big Question" about whether the owls' mother should have left.

Homework / Extension Activities

- **Home Connection:** "Internal Fossil Hunt." Students are tasked with noticing one time they feel "worried" or "brave" at home this evening, and must tell their parent/guardian which "Word Fossil" they are feeling. Extension: parents may share their own answer to model that adults feel these fossils too.
